

MVP Calculation and Eligibility

How is MVP Calculated?

MVP is determined by the number of points earned divided by the number of points available (PA).

Example for 8-Ball:

- In every 8-Ball match, there are 3 points available to win.*
- If you play 10 matches, you have 30 points available to win (3 x 10).*
- If you win a total of 13 points in those 10 matches, the calculation is:*
- $13 \div 30 = 0.43$ or 43%.*
- This means you won 43% of the points available (PA) during the session.*

Example for 9-Ball:

- In every 9-Ball match, there are 20 points available to win.*
- If you play 10 matches, you have 200 points available to win (20 x 10).*
- If you win a total of 162 points in those 10 matches, the calculation is:*
- $162 \div 200 = 0.81$ or 81%.*
- This means you won 81% of the points available (PA) during the session.*

Breaking Ties

Unless otherwise stipulated in the Local Bylaws, ties will be broken in the following order:

- 1. Total number of matches played.*
- 2. Win percentage.*
- 3. Performance points.*
- 4. Lifetime win percentage.*

MVP List and Eligibility

- The top 10 players within your Division Tier (or just Division if not tiered) will be displayed on the MVP List.*
- Players must play 7 matches with their team to become eligible for MVP standings and awards, unless otherwise stipulated in the Local Bylaws.*

MVP Tiers

The MVP Program is divided into several tiers based on players' skill levels. Make sure you are looking at your individual skill level tier when locating your standing.
